DETAILED ACTION

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The Applicant's arguments dated 4/8/2009, with respect to **claims 1-9, 13-16 and 18-22** are persuasive and therefore the Examiner concludes that the claims are allowable over the closest prior art of Nagendran. *"Methods of using Wireless Geolocation to Customize Content and Delivery of Information to Wireless Communication Devices"*

Nagendran discloses a method for finding the location of a mobile device user, and using the location to customize information and determine a way of delivering such information to the user. Location specific information generated, as disclosed in Nagendran, is generated in response to a request for information from a mobile device. In addition, signal signatures determined by the base station must be compared in a database to determine a location of the mobile device.

However, in contrast with comparable differences, the claims in the instant application is directed to the instance whereby resource information, i.e., position information of the base station, is received by the requesting element **"without"** having to request this information from a peripheral **database**. The base station itself, maintains the information and is able to transmit this information to a requesting entity without having to request this information from a secondary database. The Applicant has distinctly claimed this feature, "wherein the location of the entry node is determined based on the resource identification information by extracting the location of the entry node from the resource identification information without querying a database in

communication with the entry node, the database storing location information", which has been determined to be novel over the cited prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
